

## Press release

### Power Cooling segment of former GEA Heat Exchangers becomes ENEXIO

- Independent presence of leading provider in Power Cooling Solutions.
- The name ENEXIO is a reflection of what we do:  
**Energy. Engineering. Excellence.**
- ENEXIO will continue as a pioneer in Power Cooling Solutions and Water and Wastewater treatment with air cooled condensers (ACC), Heller technologies to all wet cooling towers, as well as dry/ wet combinations, cooling-tower components and 2H solutions for water & wastewater treatment applications and the ecological Circumix technology for ash and water management in coal-fired stations.

Bochum, Germany – November 30, 2015 – Due to change of ownership, another new standalone company has been created out of the former Heat Exchanger segment of the GEA Group AG. The Power Cooling Solutions division will appear separately and independently under the new name ENEXIO. The other segments of the former GEA Heat Exchanger Group operate under different names and market presence, like DencoHappel (former Air Treatment) and Kelvion (former Heat Exchanger Systems).

“The name ENEXIO is a reflection of what we do: **Energy. Engineering. Excellence.** These attributes define our market position and means for our customers that we are a reliable partner who is always there to meet their expectations with superior results. Our name is new but based on more than 80 years of experience in the field of power cooling business. ENEXIO will continue as a pioneer in Power Cooling Solutions and Water and Wastewater treatment with air cooled condensers (ACC), Heller technologies to all wet cooling towers, as well as dry/ wet combinations, cooling-tower components and 2H solutions for water & wastewater treatment applications and the ecological Circumix technology for ash and water management in coal-fired stations”, said Joseph A. Zwetolitz, CEO of ENEXIO. András Balogh, Global Head of Sales, continues “Our customers can select from a comprehensive product portfolio in the field of Power Cooling Solutions and Water and Wastewater Treatment with our promise to be a reliable partner delivering on-time and within specification. We are well-known as a trusted –business partner delivering high performance solutions and services for decades to our global customers.”

## About ENEXIO

ENEXIO is a reflection of what we do and what we have accomplished together with our customers as a pioneer in the field of power cooling over decades. It represents a promise to our customers and all business partners at the same time – we as a global power cooling solutions and service provider stand for **Energy. Engineering. Excellence.**

More than 80 years in the market and a great deal of success have made us a leading provider worldwide in developing and manufacturing both, wet and dry cooling systems. Depending on customer requirements we can provide any type of cooling solution for power generation efficiency while assuring cooling water economy. Our rich product portfolio ranges from all dry air cooled condenser (ACC) and Heller technologies to all wet cooling towers, united through dry/wet combinations with evaporative add-ons.

In addition to our core power cooling solutions we also offer cooling tower and water and wastewater components that ensure a high degree of operating safety and environmental protection. The ecological Circumix technology as a comprehensive solution to ash and waste water management in coal-fired stations completes our extensive portfolio.

As of 2015, the company had generated a record high order intake with approx. 800 employees in 10 countries.
