

Press release

ENEXIO showcases solutions at EuroTier 2018: Low-cost on-site production of packs for stable air conditioning, exhaust air treatment or lamella separators

- ENEXIO Water Technologies presents solutions for poultry keeping and pig farming at EuroTier, Nov. 13-16, Hanover Trade Fair in Hall 17 at Booth D39
- Exhibits on raw manure thickening, stable air conditioning and exhaust air treatment
- On-site installation of the voluminous packs reduces logistics and project costs

Herne, Germany – September 27, 2018 - on EuroTier in Hannover (Nov. 13-16, 2018), ENEXIO Water Technologies presents solutions for agricultural technology in Hall 17, Booth D39. The focus is on products for pig sties and chicken coops, including the AGRIdék climate system for ventilation and evaporative cooling, the structured plastic ODORdek packs for gas or bioscrubbers as well as lamella separators for the thickening of raw manure according to the principle of sedimentation. All solutions are based on plastic fills whose lamellar structure or honeycomb size is matched to the respective case of application.

To enable long distance transports at a reasonable price, ENEXIO Water Technologies not only provides assembled packs for many applications but also extruded foils that can be welded together on site. In comparison to the finished components, the foils usually only take up about one-tenth of the volume. The welding is easy to perform, environmentally friendly and is possible to do without any adhesives or solvents. The requisite welding equipment can be leased from ENEXIO and, on request, an ENEXIO supervisor shows your workers how to use it. Low labor costs in the destination country are frequently another advantage of on-site assembly.

Picture description:

Environmentally friendly, inexpensive and easy to execute the welding of the ENEXIO foils into fill packs. If the work can be carried out on site, it is possible to reduce logistics costs significantly, because the foils need only about one-tenth of the area that the assembled packs take up.

About ENEXIO

The name ENEXIO is a reflection of what we do and what we have successfully accomplished together with our customers in the field of dry and wet cooling systems as well as water and waste water treatment over many decades. At the same time, our name is a promise to our customers and business partners – the name ENEXIO excels as a global provider of power cooling solutions for energy. Engineering. Excellence.
